

# Dimensions

*For which object*

---

To change the dimensions associated with the selected idea space either click the Dimensions button in the inspector bar, or see the Dimensions tab in the Inspector shelf.

## Idea Space Dimensions

The idea space dimension inspector allows you to set the size of the idea space and control whether the idea space can automatically adjust its size for its content.

### Units

At the top you can choose the units used to display the dimensions. You can choose either points, printed pages, or screens.

### Width and Height

Enter a width and height and, when you press Return, they will immediately take effect.

You can also use the stepper control next to each field to increase or decrease the value. The stepper generally moves in increments of 1 but, if the units are set to points, you can hold Option to increment by 10, or hold Option+Shift to increment by 100.

Click Shrink to Minimum to reduce the size of the idea space to its minimum values based on the content currently displayed in the idea space. This calculation takes into consideration the chosen unit of measurement. For example, if you choose Pages as your unit of measurement, then Shrink to Minimum will reduce the idea space to the fewest whole number of pages required to display the current content..
