

Insert from Library

Bring in files from Curio's Library shelf

The Library Shelf

Files stored in Library shelf can be dragged into your idea space, as well.

Project Library

When dragging items in from the Project library, the result will be another asset figure instance of the dragged asset, that is the asset will only exist once in the project's internal library and your new asset figure will simply point to it.

Local Library

When dragging items in from the Local library, the file is copied into your idea space. If you hold down the ⌘ (Command) key while dragging then the file will be moved into your idea space, therefore removed from its original location.

Sleuth Library [Standard] [Pro]

Once you complete a search in the Sleuth library you may be able to drag the results, say an image or some text, into your idea space, depending on the site being searched.

Evernote Library [Standard] [Pro]

When dragging items in from the Evernote cloud library, the file is downloaded and copied into your local asset library. If you hold down the ⌘ (Command) key while dragging then the file will moved into your idea space, therefore removed from the Evernote cloud. If you hold ⌥ (Option) while dragging then an alias to the Evernote note will be created such that double-click the alias will open the note within the Evernote Mac app.
