

Style

Changing the look of your figures

Change the look of your figure with just a click via the inspector bar or inspector shelf.

Style

The style information for a figure includes coloring, borders, fill, font, and much more. With just a click the look of your figure can change completely. You can even save these looks as personal styles to use them again and again.

At the far left of inspector bar you'll find a Style button which displays a quick, popup gallery for the currently selected figure. Simply click on a style to update its look.

You can also use the mini style gallery at the top of the Shape inspector shelf to do the same thing.

And, lastly, you can right-click on a figure and choose Apply Style to choose a style from the gallery that appears.

All of these interfaces give you an opportunity to choose either a bundled or personal style that you have created. Curio Professional users can also select a master style.
