

Curiota

Curio's amazingly talented little buddy

Extend Curio's Capabilities

Curiota is a free companion app that opens up even more productivity with Curio. Curiota runs silently in the background, consumes very little memory, and has a minimal user interface: you just see a simple icon up in the menu bar. Click on that icon to create quick notes, or drag files and links to the icon to quickly add files.

The most important thing is that Curiota uses an open system for storing notes and files. There's no proprietary file format or database that could be corrupted. It's your data and you will be always able to access it, even outside of Curiota, for decades to come.

Curiota also supports print services (so you can “print” to Curiota), works as an OS X Share extension, is accessible via your Services menu, and is easily scriptable. All of the submitted notes and files are accessible and searchable using Curio's Local library shelf, discussed below. More information about Curiota can be found at www.zengobi.com/curiota.
