

Using Master Styles

Step by step workflows

Create a Master Style

1. Right-click on an idea space in the Organizer, the idea space's background, or on a figure within an idea space and choose Save as Style.
2. In the dialog that appears choose whether to create a personal style, a master style, or both a personal and a master style. Choosing both will allow you to use the style as a master in this project, but also places it into your personal repository so you can use it in other projects.

Updating a Master Style

1. Make changes to the appearance of your idea space or figure.
2. Right-click on the idea space or figure and choose Update Style or click the Update button on the Style panel in the inspector shelf.

Reverting or Reapplying an Original Master Style

- If you make changes to an idea space or figure and want to reapply the original master styling for that object then right-click and choose Reapply Style.

Deleting a Master Style

- In the Style panel of the inspector shelf, right-click on the style and choose Delete Style.

Sharing a Master Style

- In the Style panel of the inspector shelf, right-click on the style and choose Send to Friend or choose Send to Zengobi if you'd like to share your style with other Curio customers.

Copying a Master Style into Your Personal Repository

1. If you create a master style that you'd like to use in other projects then you need to copy it into your personal repository.
2. In the Style panel of the inspector shelf, right-click on the style and choose Copy to Personal.
